COVER LETTER FOR AI ENGINEER POSITION

DEAR MS. KIEU,

I was thrilled to see your posting for the position of AI Engineer on [vietnamworks.com](#), under the section 'Jobs'. Being aware of BGSV's challenging and innovative company culture, I would love to contribute my time, knowledge, and skills to the company's success. Therefore, I would like you to consider this job application for the AI Engineer position at your establishment in Ho Chi Minh City.

As mentioned in my resume, I have a Bachelor's Degree in Computer Science from VNU-HCM University of Science. During my college years, I led some projects and participated in various AI competitions, which made me familiar with the implementation and validation of AI algorithms. Before my graduation, I also gained hands-on experience from being a research intern for ABC company, as part of a Machine Learning team. With my receptive mind, I am confident in my understanding of the latest research and cutting-edge AI technologies.

Besides my technical experience, I can provide your company with my constantly trained soft skills. My adaptive personality allows me to fit in any new working environment and quickly become part of them. I have critical thinking and openness to criticism, so improvement can always be seen during my work. What is more, I have strong communication skills, including persuasion, negotiation, and the ability to explain technical concepts to customers with hardly any effort.

I know that your company focuses on providing technical solutions to 4 business sectors, including Mobility Solutions, which is a perfect match for my personal and professional interests. I would love to leverage my knowledge in AI, and apply my practical skills to the company's products, so we can achieve further success together.

Thank you for your precious time and consideration of my information. I am looking forward to discussing my skills and qualifications at your earliest convenience.

Sincerely,

Hồ Lê Minh Quân
